Swipe →

1

What does it weigh?

Gold is priced by the gram. Ask for the exact weight, and check that it is on the invoice.

TIP Gold value = weight × today's rate for the karat. Making is added on top.

كم وزن القطعة بالغرام؟

2

Which karat is it?

24K, 22K, 21K and 18K hold 99.9%, 91.6%, 87.5% and 75% gold. Look for the karat stamp on the piece.

TIP A higher karat means a higher rate per gram.

ما هو العيار؟

3

How is the making charge worked out?

Per gram or per piece? The making charge is the part that changes from shop to shop.

TIP Ask for it as a number in AED, then compare it.

كيف تُحسب المصنعية؟

4

Does the weight include stones?

Stones should be priced on their own line, not weighed as gold.

TIP For diamonds, ask for the GIA or IGI report number.

هل الوزن يشمل الأحجار؟

5

Is VAT included?

Gold jewellery in the UAE carries 5% VAT. Ask whether the price you are quoted includes it.

TIP Compare totals with VAT on both sides.

هل السعر شامل الضريبة؟

6

Can I exchange it or sell it back?

Ask about the exchange and buy-back policy before you pay, and keep the invoice.

TIP Get the policy in writing.

هل يمكن استبدالها أو بيعها لاحقاً؟

ON GET GOLD

The answers come *with the price.*

- Weight and karat on every listing
- Making charge on its own line
- Stones, fee and VAT shown separately
- The store confirms the final price before you pay

على Get Gold، كل التفاصيل واضحة مع السعر.
